

Let Flying M Air take you by helicopter to the

Grand Canyon Skywalk

The Grand Canyon Skywalk is suspended 4,000 feet above the Colorado River on the very edge of the Grand Canyon. Able to support 71 million pounds and capable of sustaining winds in excess of 100 miles per hour, the glass and steel Skywalk is considered by many to be a man-made wonder of the world. Why spend 8-10 hours in a car or bus to get there when Flying M Air can take you there on a scenic flight in less than half the time?

Your flight begins at a Phoenix area airport of your choice or Wickenburg and heads northwest to the Hualapai Reservation. There, you'll use the Hop On/Hop Off narrated shuttle service to travel between each of the Grand Canyon West points of interest, including Eagle Point (where you can Walk on the Skywalk and see a Native American cultural performance), Guano Point historical guano mine and tram, and Hualapai Ranch cowboy games and demonstrations. There are plenty of opportunities for photos of the scenery and Hualapai tribe members in native dress and for lunch at one of the tribe's cafés.

Your return flight will take you back to Phoenix or Wickenburg with a brief stop for fuel at Kingman. Relax from your busy day as the desert scenery glides by beneath you. You'll be back in time for dinner!
